

Total Wealth Plan

The *Total Wealth Plan* is a comprehensive, personalized financial check-up that helps you organize and manage important financial decisions more simply and profitably.

The check-up starts with a review of your current financial situation. It then provides a concise, but thorough set of recommendations... pointing out how you may be overpaying taxes and other financial expenses such as interest, commissions, and insurance costs. The review then goes on to give keen insight about your investments, how to meet college and retirement funding requirements, as well as addressing all other financial matters of concern.

In order to determine if the *Total Wealth Plan* will be beneficial to you, we review the completed questionnaire with you during an initial meeting that is no cost, and with no obligation to use our services. The initial meeting helps us to diagnose your current financial situation and provide you a personalized introduction to the complete array of financial and investment advisory services we can provide.

If you should decide to use our services, we will prepare the written *Total Wealth Plan* for you with follow-up discussion meetings included. Our compensation for the comprehensive written review, which includes recommendations and follow-up meetings, will be discussed in advance. However, you are not obligated to proceed further after the free initial meeting. Also, the fact that this review comes with a complete satisfaction guarantee is nice news too.

We hope you will consider becoming a new client and tell your associates and friends about our services as well!

Sincerely,

Total Wealth Planning

How To Get Started

Getting started starts with getting to know each other. You need to know whether we are the right fit for you, and we need to determine whether we can add enough value and meet your expectations for reaching your goals and objectives. To do this, we offer you a no cost, no obligation introductory meeting. In order to make this meeting most productive and beneficial, we recommend that you complete our Total Wealth Plan Questionnaire.

Total Wealth Plan Questionnaire

Our proprietary *Total Wealth Plan* is an on-going process we developed to provide you a concise and understandable comprehensive review of your entire financial situation. By evaluating each financial decision as part of a comprehensive whole, you are made aware how each decision impacts other areas of your finances. This is important for you to gain a perspective about how your short-term and long-term decisions influence your particular financial journey. In turn, you are able to prioritize and implement the very best solutions and strategies for achieving your specific goals and objectives, and to monitor your progress along the way.

By gathering your data and completing *The Total Wealth Plan Questionnaire*, we can more easily streamline the process, identify where you stand with your finances today, and pinpoint areas of opportunity for you to make improvements so that you can achieve your life goals.

Please Note:

In order for you to derive the most benefit from your introductory, no obligation meeting with us, it is preferable, but not required, if you would complete and provide us this questionnaire in advance of your scheduled meeting.

Planning Goals, Objectives and Concerns

All planning should begin and end with your personal considerations and goals. To help us better understand yours, please number the following in order of their importance to you, with (1) indicating the greatest importance. There are 14 items. If any are of little or no value or simply do not apply then leave them numberless.

- _____ Maintaining a comfortable lifestyle through my/our retirement years
- _____ Minimizing income and capital gains tax
- _____ Planning for a business transfer and succession
- _____ Saving for my own retirement
- _____ Saving for my children's college education
- _____ Protecting my family's assets from creditors and litigation
- _____ Supporting my interests in and commitments to charitable causes
- _____ Generating adequate cash flow to operate and grow my business
- _____ Optimize the use of borrowing to maximize my/our net worth
- _____ Diversifying a concentrated stock position or stock options
- _____ Ensuring that family members with special needs are well cared for
- _____ Creating a legacy that will keep my children and grandchildren productive
- _____ Paying down debt
- _____ Delaying retirement to fund your children's college education?

Retirement Planning

Money "systematically saved" with the end in mind can compound to become secure nest egg for your retirement. The reason why so many people fail at saving money is they have no *visual plan* which shows in black and white just how much money needs to be and can be accumulated with a disciplined and steady accumulation program. If we know when you want to retire, and how much you want to live on, and how much you are saving towards retirement, we can prepare a retirement cash flow which shows if you will run out of money during your lifetime. If you are about to retire, or have unexpectedly lost or had to change jobs, we can show you the *hidden* taxes that the IRS has in store for you, and hopes you never learn about in advance.

Desired retirement age: You _____ Spouse _____

Monthly retirement income desired: (After-taxes, in today's dollars) \$ _____

Current monthly savings for retirement: (Employee) \$ _____

(Employer match) \$ _____

Current monthly savings for retirement: (Personal outside of work) \$ _____

During retirement is your goal to spend down your capital or preserve wealth for your children or other beneficiaries? Preserve Partially deplete Totally deplete Not concerned either way
